SPA AND ORGANIC MICRODERMABRASION™

A safety net for your skin

SPA AND ORGANIC MICRODERMABRASION™ offer the newest option in the quest for youthful vibrant skin, a true desire of men and women of all ages.

Holistic technology for today's beauty demands

SPA AND ORGANIC MICRODERMABRASION™ is the holistic option for modern skin care technology. It provides a gentle effective mechanical peeling of the skin and only works only on the epidermal layer of the skin.

Why choose
SPA AND ORGANIC MICRODERMABRASION™

The main advantage of SPA AND ORGANIC MICRODERMABRASION™ is its ability to control the level and area of abrasion. This helps ensure that the skin tissues are biologically respected and skin trauma is minimised. The skin can then heal more evenly and naturally instead of as a rushed response to skin injury.

SPA AND ORGANIC MICRODERMABRASION™ is fast and painfree, leaving little or no redness. It can be used to treat and minimise the most difficult skin conditions, or just rejuvenate and maintain the health of the skin. Treatments last less than an hour and do not interrupt your busy schedule.

DIAMOND™ DIAMOND™ DIAMOND™

ORGANIC MICRODERMABRASION

The Diamond Organic and Diamond Fusion Systems™ are fast, virtually pain-free and leave little or no redness. They help minimise the most difficult skin conditions, while rejuvenating and maintaining the health of the skin. Treatments take less than an hour and are non-invasive.

Benefits To The Skin

The fibre of *Diamond Organic Grains™* makes them a softer media to use in microdermabrasion. Where traditional crystals are sharper and exfoliate in a more "cutting" way, the Grains provide a more "polishing down" approach to exfoliation. They are less disruptive to the epidermis and offer an alternative microdermabrasion treatment for more sensitive skin.

Because *Diamond Organic Grains™* are less aggressive, they provide the opportunity for more frequent treatments, thereby taking advantage of the below-surface effects, such as collagen stimulation, blood circulation, oxygenation and cleansing lymphatic flow.

SPA AND ORGANIC MICRODERMABRASION™

Smooth skin surface is the key

Maintaining the level of cellular growth on the skin surface directly relates to the freshness and youthfulness of the skin's appearance. On average, we renew our surface skin every four to six weeks. However, with age and poor health, renewal is considerably slower. By mechanically altering the epidermis with the SPA AND ORGANIC MICRODERMABRASION™ cell renewal is regulated. Then, with a healthy, balanced skin surface, it is possible to improve or eliminate many skin conditions and skin imperfections.

SPA AND ORGANIC MICRODERMABRASION™ can be used to treat:

- Aging and sun-damaged skin
- Some types of acne scarring and acne
- Altered pigmentation
- Stretch marks
- Fine lines
- Enlarged and clogged pores
- Skin and body rejuvenation

Altered pigmentation. 15 treatments over a 3 month period.

Fine lines. Only after 1 treatment.
