

INTRODUCING

"AIR SHAVE® Gel"

Like all of our products, AIR SHAVE® Gel has a money back guarantee!*

Our new shave gel is made from the finest ingredient combination we could develop. It far exceeds the lubricity of any shave gel on the market. Try rubbing it between your fingers and see for yourself. It simply doesn't dry out!

Instructions: AIR SHAVE® Gel is simple to use. Apply the gel to moist skin with your hand. Rub it onto the skin gently. You won't need very much. An eight ounce bottle should last the average woman at least three months.

AIR SHAVE® Gel does not "lather". Simply apply and shave.

Men. Although primarily for use with a blade, try it with the Panasonic or Norelco wet/dry electric shavers! You'll shave closer than ever! AIR SHAVE®

Gel leaves your skin with a satin-like feeling and fully moisturized, not dry like other shaving gels and creams.

The gel is so effective at reducing friction, you will be less likely to cut or scrape the skin. This is very important in helping to minimize the appearance of ingrown hairs/razor bumps.

Women: With AIR SHAVE® Gel you will now be able to see around knees and ankles when shaving so you can avoid nicks and cuts. Your skin will feel extremely smooth after shaving. In fact, your shave will be so close that you will not face the "afternoon rubs", as so many of our customers have told us.

After shaving, your skin is left with a satin-like feeling and fully moisturized.

* MONEY BACK GUARANTEE!

If you are not satisfied with any of our products within thirty days, return to the point-of-purchase with proof of purchase for a full refund.
