

THANK YOU FOR PURCHASING TEND SKIN® LIQUID

Tend Skin® liquid reduces the appearance of:

1. Razor bumps
2. Ingrown hairs
3. Skin redness after hair removal

All of these cosmetic problems relate to hair removal. This means Tend Skin® liquid is good for women and men. Men can use it on their faces, necks and back of the head. Women will find it useful on legs, bikini lines, underarms and anywhere else hair removal creates ingrown hairs or razor bumps. Tend Skin® liquid works very quickly. You will see results in 24 hours.

Tend Skin® liquid has a money back guarantee. * Use in conjunction with shaving, waxing, electrolysis and epilating.

ALLERGY: Caution, if you have a true allergy to Aspirin (hives, itching) do not use this product.

Tend Skin® liquid may cause mild exfoliation. This is beneficial as it "will leave your skin looking baby smooth", and will help remove rough skin build-up. Try applying it to your face daily. Your skin will glow, and people will notice!

Perform a test patch on a small area of skin and wait 5 minutes. If you have no reactions, proceed with full application.

Caution: Flammable, do not ingest, KEEP AWAY FROM CHILDREN, avoid contact with eyes, not tested for use during pregnancy or nursing, avoid dyed/finished surfaces and jewelry, APPLY only to DRY skin. You may see some crystal formation in cold climates. This is normal. Crystals will disappear after the bottle is at room temperature for one or two days. Product performance is unaffected. Do not remove hair with tweezers. It aggravates the skin and can make ingrown hair problems worse.

Ingredients: isopropyl alcohol, water, propylene glycol, acetylsalicylic acid, glycerin, cyclomethicone.

INSTRUCTIONS FOR USE

FOR PRE-EXISTING INGROWN HAIRS/RAZOR BUMPS

These instructions apply to men and women. The product needs time on the skin undisturbed to work. Be sure to apply to DRY skin. Apply at night before sleep and again in the morning after showering, shaving, and drying. Do not wash off. Moisturizer or cologne can be applied OVER the product once it dries.

Once skin clears, apply Tend Skin® liquid daily to maintain. Adjust usage over time to determine the least usage needed.

These instructions apply regardless of hair removal technique.

Uses For Women

FOR SHAVING: Once skin clears, apply after shaving to maintain clarity and to help reduce post-shave redness. *CHANGE BLADE WHEN IT LOSES THE "NEW BLADE" FEELING.* Any "scraping" of the skin will work against the product and worsen ingrown hairs.

FOR USE WITH ELECTROLYSIS: Apply before treatment as a cleanser. Apply after treatment to help reduce the appearance of redness, and minimize post-treatment "bumping".

FOR USE WITH WAXING: Applying Tend Skin® liquid before waxing will ease the wax "pull". The hairs will feel "loosened". Applying after waxing helps improve the appearance of skin redness in 15-20 minutes and helps minimize next-day post-wax bumping.

MAINTAINING CLEAR SKIN: Once skin has cleared, apply several times weekly to maintain clarity.

Uses For Men

FOR THOSE WITH INGROWN HAIRS/RAZOR BUMPS ON FACES, NECKS, BACK OF THE NECKS AND SCALPS

Use twice daily until clear as directed. Then use daily after shaving to maintain clear skin. Replace razor blade as soon as it does not have that "new blade" feel. Otherwise, the scraping will make the problems worse. You can use a blade, clippers, etc. Use a blade for closest shave. The appearance of any "bumps" may be reduced if you apply Tend Skin® liquid after a blade shave.
